ESOL: Scheme of Work BEGINNERS [Higher]

The materials that go with this scheme can be accessed through the Leeds City College network> Student pools> Examples> Beginners. The main materials can also be accessed on line at ESOL.co.uk> beginners.

The course is designed to teach students the first 100 dolch words, plus cvc words for all short vowels. Other topic words and letter combinations are taught for recognition. The course emphasises letter shape and position and developing grapho-phonics skills.

Students can access the materials and listen to the words via the online site at www.esol.co.uk.

For each week there are two lessons for example 1.1 and 1.2. These are the materials the students can access. In some cases there may be supplementary materials offered (which you can find in the supplementary folder).

Tutors are encouraged to upload supplementary material in the supplementary folder (student pools, examples, esol, beginners, lessons supplementary material). Tutors can also adapt material as long as they save it under a different name and place in the supplementary materials folder or their own folder.

In order to maintain the integrity of the course it is necessary to cover the key phonology and structures for each week.

In the later lessons there is a topic based emphasis and therefore the phonology is dealt with separately.

Although the tutor will follow the scheme regarding this topic based material and the structures and functions to be covered, they may wish to adapt the present material in order to suit the individual needs of the students within their classes.
S+L performance criteria.
For the higher beginner level, S+L performance criteria is linked to the criteria for the Trinity Step One exam. A full description of this is given at the end of this document. This is highlighted in blue within the scheme.
For higher beginners the performance criteria is based around Trinity Step Two. This is included within the SOW to allow accurate tracking of progress towards higher beginner level. Trinity Step two criteria are highlighted in green. However, the students do not take the Trinity exam. Instead the teacher will do a similar non accredited exam. A full description of these criteria is given at the end of this document.

Literacy Performance criteria.
The course is designed to teach students the first 100 dolch words, plus cvc words for all short vowels. Other topic words and letter combinations are taught for recognition. The course emphasises letter shape and position and developing grapho-phonc skills. The dolch words are highlighted in purple within the scheme.

There is also an emphasis on handwriting, positioning in regard to the line, word shapes and functional literacy, particularly form filling, simple notes. These are written in black in the performance criteria.

E+D is highlighted in brown.

**Students** greet others students and ask which country they come from. (E+D). The tutor uses a map and Google images to get some pictures of the different nations represented.

The tutor is actively involved in assessing students to determine their individual learning styles and any changes that may need to be made to resources and teaching methods to accommodate any particular needs. The tutor will also assess what adjustments could be made to facilitate learning and whether an LSA would be desirable for any individuals.
